

SILVER ANGELO BONTO

AI Systems Builder · Full Stack Developer · Security Analyst

Quezon City, Metro Manila, Philippines · silverangelob@gmail.com · +63 994 493 8563 · Live product: zolt-ai.online

SUMMARY

Self-taught developer building software since 2021. Founder and sole builder of ZOLT, a live AI platform that sells access to 48 AI models through one prepaid key, with my own metering gateway, payment rails, and desktop apps. For the past 3 years I have built with AI-assisted workflows — directing coding agents, verifying their output, and holding it to production standards. I take products from zero to deployed, alone, and I run them after launch.

EXPERIENCE

Founder & Solo Builder — ZOLT (XOREAX IT SOLUTIONS)

2025 – Present · Quezon City · Live at zolt-ai.online

- Designed and built a credits-based AI platform: one prepaid key works across 48 AI models (Claude, GPT, Gemini, DeepSeek, and others) in chat apps, coding tools, and terminals.
- Built the metering gateway on Cloudflare Workers (JavaScript, Durable Objects, KV): per-model credit pricing computed from real upstream costs, per-key hard spend caps, automatic merchant routing and failover, and real-time balance tracking. Designed so a key can never spend more than it was sold for.
- Wired the money end to end: Whop checkout, crypto payments, and QR Ph, with keys created or refilled automatically on confirmed payment and delivered by email. Added a phone-based payment inbox (Android SMS gateway and notification listeners) that matches incoming payments by amount and time.
- Shipped the customer apps myself: a Windows balance widget (Tauri/Rust), a setup app that configures Codex, Claude Code, OpenCode, and Hermes with one key, a ZOLT CLI (fork of OpenCode), a rebranded desktop AI app (fork of Cherry Studio), a Cursor companion app (fork of cursor-byok), and VS Code / Cursor extensions with live balance tracking.
- Run support alone: Telegram and Facebook bots tied to the gateway admin API, plus a web support inbox with agent claiming and quick replies.

AI Red Team Analyst — Contract

2026 – Present

- Engaged for AI red teaming work. Details are under NDA; scope and methods available only within what the agreement allows.

Full Stack Developer — Freelance / Self-Employed

January 2021 – Present · Quezon City

- Delivered 20+ client projects as sole developer — web apps, automation tools, desktop software, and scripts, from spec to deployment.
- Engineered FiveM server tooling in Lua and C#: an anti-cheat detection engine covering teleport, speed, and injection exploits on live multiplayer servers.
- Built AurisX, a C# Blazor crosshair overlay desktop app with real-time rendering and custom profiles.
- Developed a Windows PC optimization suite (OS tuning, registry automation, BIOS-level configuration guidance) distributed to end users.
- Wrote RP2040 microcontroller firmware in C/C++ for custom hardware peripherals.

- Conducted security risk assessments and built encryption tools for client systems; applied reverse engineering for debugging, compatibility, and security research.

SKILLS

AI & LLM systems: multi-model API gateways, usage metering and pricing, model routing and failover, AI agent tooling (Cursor, Windsurf, Qodo), prompt design, output verification

Languages: JavaScript / TypeScript, Python, C#, C/C++, Lua, HTML/CSS, Bash

Web & backend: Node.js, Cloudflare Workers, REST APIs, React, Next.js, Blazor, Tailwind CSS

Desktop: Tauri (Rust), Windows internals, VS Code / Cursor extensions

Security: vulnerability analysis, anti-cheat engineering, reverse engineering, secure coding, risk assessment

Automation & ops: Playwright, Selenium, bots (Telegram, Facebook), payment integrations (Whop, crypto, QR Ph), Git, CI/CD

CERTIFICATIONS

IBM RAG and Agentic AI Professional Certificate (2026) · Google AI Professional Certificate (2026)

Fortinet Certified Associate (2024) · Fortinet Certified Fundamentals (2024)

IBM Cybersecurity Analyst Professional Certificate (2023) · IBM Full Stack Software Developer Professional Certificate (2023)

IBM Data Science Professional Certificate (2022) · IBM IT Support (2024) · Google IT Support (2022) · IBM DevOps, Cloud & Agile Foundations (2022)

EDUCATION

ICT Strand — Senior High School, Metro Manila College, Quezon City (2023)
